MAKING MEMORIES WITH COMMERCIAL HOLIDAY LIGHTING SINCE 1959

That's when George Purucker, who specialized in illuminated retail displays, approached the Merchant's Association of Kansas city with an idea.

The Story Behind the Sparkle

A World War II veteran, Purucker had come to the Kansas City area from Pennsylvania in 1946. He was a graduate of the Carnegie Institute of Technology in Pittsburgh, and he found work as a lamp specialist for the General Electric Supply Company before founding Creative Displays in 1959 in his garage. Always on the lookout for new ideas, while on a trip to England during the holiday he noticed large, illuminated crowns adorning the retail districts. He thought they would be just the thing to help drive shoppers back to downtown stores. The decorations were a hit for downtowns across America, and they were just the beginning of creating enduring memories for families throughout the country.

1962

2024

The Future Is Bright

Six decades later Creative Displays continues to draw on the innovative spirit of our founder. We have become an industry leader with over 60 years of designing and selling high quality, commercial grade holiday lighting supplies and decorations. It is important to us to build strong customer relationships and supply our loyal customers with innovative products and designs that deliver commercial grade performance and longevity. We strive to simplify the whole process of designing and finding the right type of lighting for your holiday lighting display.

Let us help plan your experience and share our many tips and ideas from years of expertise.

LED Products

4 - 20

Check out our full line of LED bulbs, mini lights, strobes and more, plus several products that feature the latest LED technology.

Incandescent Products

21 - 22

Our commercial-grade incandescent bulbs and mini lights are a cut above the retail-grade incandescent holiday lights you often find in the big box stores.

Cords, Plugs and Strings

24-27

Old man winter can dish out plenty of havoc, but our light strings are built to resist moisture and UV rays to keep coming back season after season.

Installation Supplies

28- 29

We've got all the commercial-grade supplies you need to make this year's holiday display the best ever, all at factory-direct wholesale prices.

Wreaths, Garland and Bows

30

Wreaths, garland and bows bring a warm, traditional touch to the Christmas holidays.

Proudly featuring Minleon®

Minleon® has become the largest manufacturer/exporter of LED decorative replacement bulbs to the US by focusing on superior product quality and reliability. Minleon® introduced the first dimmable LED retrofit for use with automated software, and is the only company in the LED market to provide a complete line of RGB lighting products, controllers and software. Creative Displays was one of the first authorized Minleon® distributors in the US and has been supplying these commercial-grade products since 2006. Minleon® and Creative Displays will be expanding their product line extensively in the near future.

Pro-Grade® C-9 SMD LED Bulbs

Pro-Grade® C-9 SMD LED Bulbs

New Pro-Grade® SMD LED C-7 and C-9 retrofit bulbs from Minleon® represent the next generation of LED holiday lighting. This cutting-edge LED design creates more light output (brightness requires less wattage (more energy efficient and lasts approximately twice as long (rated up to 60,000 hours than standard C-7 and C-9 LEDs. Both bulbs feature a faceted polystyrene lens that's virtually unbreakable with an impressive IP65 rating for complete protection against dust and water damage. Packed in bags of 25 - Case quantity of 500

Pro-Grade® F-50 LED Flame Lamps

**Consumes Less Than One
Watt of Electricity!**

Pro-Grade® F50 LED Flame Lamps

Our Pro-Grade® F50 LED Flame Lamps consume less than 1 watt of electricity per bulb and are rated at 50,000 + hours. They're UL-approved for both indoor and outdoor use and they fit in a medium E27 base or standard light bulb socket. Many retail-grade F50 LED Flame Lamps are non-dimmable and may contain 10 LEDs. Our commercial-grade F50 retrofit bulbs are dimmable and provide superior brightness with 14 LEDs! These bulbs feature a smooth finish in a variety of colors and are packed 25 bulbs per bag.

Pro-Grade® LED M-5 Minibrites®

When you compare our Minibrites® to the minis sold in the big box stores, you'll quickly realize there is no comparison.

Many retail-grade LED mini lights are half-wave rectified, which means they turn off and on at a rate of 60 times per second and thus may appear to "flicker". Our Pro-Grade® LED Minibrites® feature full-wave rectification, which means they turn off and on twice as fast – 120 times per second, providing a bright glow without the flicker.

Minibrites® are UL approved, affordably priced and come in a variety of dazzling colors.

They're easy to install with no poly bag or tray to clean up – simply take them out of the case, untie the wire binder and you're ready to get the max from a mini. Packed 12 strings to a case.

- * Totally Dimmable
- * Crush-Resistant Waterproof
- * Connect up to 80 Strands
- * Rated at 50,000 Hours
- * Full-wave rectified
- * Works with Animated Controllers
- * 4" bulb spacing

**RGB Technology!

Each socket has an LED bulb that changes colors (red, green, blue) in a pre-programmed plug and play pattern. They have a 6 inch bulb spacing and are approx. 25 ft long.

*MultiColor:

Red, Yellow, Blue, Green & Orange

Pro-Grade® SMD LED Snowfall Tubes

Pro-Grade® SMD LED Snowfall Tubes are the brightest, most energy efficient tube light we've ever offered. These double-sided tubes contain up to 96 points of SMD LED light. Each case contains 5 Snowfall Tubes. Ten tubes are required to fill a Power Supply String. You can mix and match colors and sizes on the Power Supply String using 2835 super bright SMD technology. Uses approximately 4 watts.

Snowfall Tube Power Supply

The Snowfall Tube Power Supply String plugs into any 120V outlet and features a 10-foot lead wire with a male plug and a 5-foot end wire with a female plug – total overall length is 42 feet. Ten sockets per string are spaced 3 feet apart and up to 3 strings can be connected together.

Commercial-Grade Incandescent Minibrites®

Our incandescent mini lights stand head and shoulders above the retail-grade mini lights you typically find in big box stores.

Commercial-Grade Minibrites® are rated at 3,000 hours and UL listed for both indoor and outdoor use. The shunted design allows power to bypass each bulb, so if one lamp burns out the others stay lit. Minibrites® feature super-bright bulbs with snap lock sockets to help prevent vandalism and twisting (the most common reasons for mini light failure). Unlike most retail-grade mini lights, our end-to-end plugs and sockets allow you to connect up to ten 50-light strands with confidence.

Minibrites® are available in 22-gauge green or white wire in 50 - or 100-light strings. Lights are spaced at 3"x 6" x 3" (except where noted.) Installation is easy with no poly bag or tray to clean up. Just undo the wire tie and put these little tough guys to work.

20.4 watts per 50-light string – Connect up to 10 strings
40.8 watts per 100-light string – Connect up to 5 strings

Create a
Stunning Entrance!

Pro-Grade® Twisted Wire Light Strings

Available in 250-foot spools of 14-gauge black twisted wire and black twist-on Bakelite sockets for use with intermediate-base C-9 E17 lamps or 12-gauge wire, medium-base E27 lamps. Order lamps separately.

These extremely durable commercial-grade light strings are manufactured with a PVC-coated, soft wire jacket that stays pliable in extreme cold and provides better contact with the stranded copper. The soft wire jacket also contains a UV inhibitor to help prevent cracking caused by damaging sun rays. No matter what old man winter does out, Pro-Grade® light strings keep coming back for more...season after season.

Also available in 250-foot spools of 16-gauge black twisted wire and black Bakelite sockets for use with C-7 lamps or G-12 globe lamps. These light strings give the effect of mini lights in trees but are much more dependable. Order lamps separately.

- * 12, 14, or 16-gauge, UL- approved, double-stranded, twisted wire
- * Sockets can be easily removed for custom installation on the job site (Pro-Grade® only)
- * Available in 250-foot spools with 12, 18 or 24-inch spacing
- * Uses Pro-Grade® electrical plugs

Pro-Grade® Select Light Strings

Our new line of Select Light Strings are manufactured to meet stringent Pro-Grade® standards, they just cost less. Medium-base strings use a round, 14-gauge wire. C-7 and C-9 base strings use a flat, 16-gauge wire. All Select strings are black and come in 250-foot long spools. Medium-based suspended socket uses a flat, 16-gauge wire and are in 100 foot spools. All Select strings are black.

Pro-Grade® Moisture Blocking Gaskets

You've probably had this experience. It's a rainy night and suddenly the yard goes dark. Water has seeped into the connection and caused a short that trips the GFCI protection switch. Our super-soft Pro-Grade® Moisture Blocking Gaskets create a watertight seal that keeps moisture out and your lights shining bright. Use them on all your outdoor connections including holiday lights, pumps, generators, patio lights, fountains, and more. Works with both 2- and 3-prong connectors. Sold in bags of 25, 50 and 100.

Pro-Grade® Weatherproof Termination Plugs

It's time to stop tripping those GFCI outlets! It's a rainy or icy night and suddenly those beautiful lights go dark. Water has seeped into the connection and caused a short that trips the GFCI protection switch. Fear not. We have the cure! Our new Pro-Grade® Weatherproof Termination Plugs create a watertight seal that keeps moisture out and your lights shining bright. The special compound stays intact even in below freezing temps, defeating hard rain and extreme weather. Use them on all your outdoor connections including holiday lights, pumps, generators, patio lights, fountains, and more. Works with both 2- and 3-prong connectors.

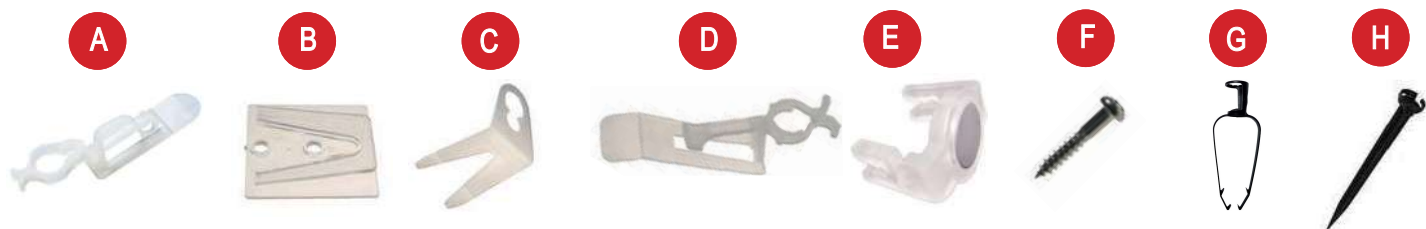

Electrical Tape

Don't let the low price fool you. Like the well-known national brand, our Pro-Grade® Vinyl Electrical Tape is 66 feet long, 3/4" wide, commercial grade, fire-resistant, UL-approved. It just costs a whole lot less.

LED Repair Kit & Replacement Pods

This all-in-one repair kit includes a fuse tester, LED bulb tester and bulb puller. Now you can fix a light string in minutes with the pull of a trigger. We've never seen anything like it on the market, but we tried it and it works! The kit also includes two replacement PODs and 2 repair clips to isolate the problematic LED bulb. These PODs don't light up, but they're used to help maintain the electrical balance after removing a failed bulb or socket from an LED light string. The PODs are easy to use and do not require the wire insulation to be removed.

BLUETAP	3M	Self-Stripping electrical tap	100

Installation Clips

When it comes to Christmas light clips you have a choice. We have a full line of quality, commercial-grade clips that are used by holiday lighting installers nationwide. Each of our clips has a UV inhibitor built-in to protect against outside elements.

No-Hassel Clips

The super-convenient No Hassle Clip stays attached to the light socket and can easily be stored until next season. Unlike other clips, the No Hassle Clip does not fall apart and stays with the lights, preventing any clips from being lost or left behind.

Wire Ties

Fasten commercial-grade lights to buildings and trees using these tie wraps. The black 8" and 15" ties have a UV-inhibitor mixed in to help protect against the winter weather.

Wire Tie Mounts

Four-way cable-tie mounting base can be mounted using the adhesive backing or a #4 screw.

Taiga® Wreaths, Garland and Outdoor Velvet Bows

Taiga Evergreens® Wreaths & Garland

These pre-lit wreaths and garland are extremely plush and durable with warm white or cool white LED lights. Bolts are included for both 2- and 4-piece wreaths. This pre-lit residential garland is extremely durable and beautifully trimmed with 150 warm white LED mini lights. Simply bolt the connectors and hang.

Be Social With Us!

Follow us on social media for the latest product updates, company news and events! You can also connect with our design experts and other holiday lighting enthusiasts!

For a kid tethered to a life-saving machine, a wish brings hope. For a kid who can't run, jump and play, a wish brings hope. For a kid who spends day after day in a hospital bed, a wish brings hope.

The dedicated people who care for critically ill children tell us that when a lifelong dream is fulfilled, children often respond positively both emotionally and physically. For nearly two decades, Creative Displays has partnered with the Make-A-Wish Foundation to help give kids the strength and resolve to live for tomorrow.
